Total Science

The Scene

Droppin' science

The reviews are in, and the critics are saying this about the London's drum 'n' bass duo Total Science:
"Total Science has pioneered a

signature sound of their own. The duo is unafraid to experiment with their epic arrangements. You will hear the influences of other music styles in their tracks. They are always pushing the bar in drum and bass," declares Toki.

"It's their tunes. They do all kinds of styles. They can do dark stuff, dubby stuff, chill stuff and get funky. They can flip any kind of style," says Kause. "I'm really excited to open for them."

"They're true pioneers that are still coming through. They came out with that track 'Champion Sound' years ago, which has been remixed by everyone, and they're still relevant, still pushing the threshold," says Govern-T. (Check out his Total Science warm-up set on the "Underground Sounds" show on KTUH this Friday, 6 - 9 p.m.).

"Total Science. Gonna be baaaaad," posts Konception on quadmag.com.

Come see what the fuss is all about this Saturday at "Juicy" at the Maze.
